SUMMARY

Developer experienced in AI systems, iOS development, and full-stack engineering. Built production-grade applications spanning machine learning pipelines, real-time communication systems, and augmented reality experiences using Swift, Python, and modern AI frameworks.

SKILLS

Languages: Python, Swift, Java, C, C++, JavaScript, HTML5, CSS3
Frameworks & Libraries: Flask, FastAPI, TensorFlow, Keras, Scikit-learn, SwiftUI, UIKit, SQLAlchemy
Databases & Cloud: MySQL, PostgreSQL, SQLite, Firebase, Supabase, Prisma ORM
Tools & Platforms: Git, Linux, Xcode, Jira, Jupyter Notebook, Google Colab, Pusher, Twilio API
Concepts & Technologies: CNNs, SVMs, Computer Vision, REST APIs, MVC, MVVM, Agile Development

EXPERIENCE

- Infosys, iOS Intern**
 - Engineered a high-performance iOS frontend using SwiftUI, glassmorphism, animations, and MVVM architecture.
 - Built a real-time communication system using Pusher, Hono (Node.js), and Prisma for multi-role messaging.

04/2026 – 05/2026
Mysuru
- Infosys Springboard, Artificial Intelligence Intern**
 - Developed an end-to-end ML pipeline for scanner brand identification from scanned document images.
 - Built preprocessing pipelines and trained SVM/CNN models, achieving ~93–96% classification accuracy.

11/2025 – 02/2026
Pune, India
- Softech It Solution, Full Stack Trainee**
 - Contributed to a production-grade School Management System using Python-Flask and MySQL.
 - Built analytics dashboards and dynamic report-card generation workflows for institutional operations.

08/2025 – 11/2025
Pune, India

PROJECTS

- Samwāad, Real-Time Speech Diarization & Accessibility Platform**
 - Built an iOS accessibility platform enabling real-time captioning, diarization, and live transcription refinement.
 - Engineered a low-latency, offline-first architecture for AI-assisted summarization and secure conversation synchronization.

08/2025 – Present
- QuanView, AR-Based Quantum Mechanics Visualiser**
 - Developed an AR-based iOS application to visualize quantum mechanics concepts using ARKit and RealityKit.
 - Built immersive real-time 3D simulations with gesture interaction and spatial mapping.

02/2026 – 03/2026
- ItineraryAgent, AI-Powered Travel Itinerary Assistant**
 - Built an AI-powered travel assistant, converting WhatsApp conversations into structured itineraries.
 - Integrated LLM workflows, Twilio APIs, and dashboard-based lead management.

04/2026 – 04/2026

EDUCATION

MIT World Peace University,
Bachelor of Technology in Computer Science & Engineering
CGPA: 9.10 / 10

2023 – Present
Pune, India
