 Portfolio

SUMMARY

Computer Science undergraduate with experience building enterprise Generative AI solutions, iOS applications, and full-stack systems. Skilled in LLM applications, AI automation, and software engineering through internships at EY and Infosys, with a strong interest in AI-powered enterprise products.

SKILLS

Languages: Python, Swift, C, C++, JavaScript, HTML5, CSS3
Frameworks & Libraries: Flask, FastAPI, Node.js (Hono), TensorFlow, Keras, Scikit-learn, SwiftUI, UIKit, SQLAlchemy
Databases & Cloud: MySQL, PostgreSQL, SQLite, Firebase, Prisma ORM
Tools & Platforms: Git, Linux, Xcode, Jira, Jupyter Notebook, Google Colab, Pusher, Twilio API
Concepts & Technologies: CNNs, SVMs, Computer Vision, REST APIs, MVC, MVVM, Agile Development

EXPERIENCE

EY (Ernst & Young Services Pvt. Ltd.), Summer Intern - Gen AI

- Developing enterprise AI solutions for consulting workflows, including LLM-powered automation and Microsoft PowerPoint integration.
- Contributing to multi-agent AI systems, enterprise workflow automation, and research across SAP-integrated business processes and Generative AI applications.

07/2026 – Present
Pune, India

Infosys, iOS Intern

- Built a real-time communication system using Pusher, Hono (Node.js), and Prisma for multi-role messaging.
- Engineered a high-performance iOS frontend using SwiftUI, glassmorphism, animations, and MVVM architecture.

04/2026 – 05/2026
Mysuru

Infosys Springboard, Artificial Intelligence Intern

- Developed an end-to-end ML pipeline for scanner brand identification from scanned document images.
- Built preprocessing pipelines and trained SVM/CNN models, achieving ~93–96% classification accuracy.

11/2025 – 02/2026
Pune, India

PROJECTS

Travel Reimbursement Agent, Autonomous AI Approval System

- Engineered an autonomous AI pipeline using FastAPI, Streamlit, and Groq (Llama 3.3) to evaluate corporate travel claims against policy documents.
- Built custom tool-calling mechanisms for receipt validation and limit checking, generating structured JSON decisions and comprehensive audit logs.

06/2025 – 07/2025

QuanView, AR-Based Quantum Mechanics Visualizer

- Developed an immersive iOS application using SwiftUI, ARKit, and RealityKit to visualize quantum mechanics concepts through interactive augmented reality experiences.
- Implemented real-time 3D simulations, gesture-based interactions, spatial plane detection, and an interactive Lab Notebook for capturing and reviewing AR experiments.

02/2026 – Present

ItineraryAgent, AI-Powered Backend Workflow System

- Built an AI-powered travel assistant converting WhatsApp conversations into structured itineraries.
- Integrated LLM workflows, Twilio APIs, and dashboard-based lead management.

04/2026 – 04/2026

EDUCATION

MIT World Peace University,
Bachelor of Technology in Computer Science & Engineering
CGPA: 9.18 / 10

2023 – Present
Pune, India
